

## LVS Event-Driven Portfolio

### Strategy Description

The LVS Event-Driven Portfolio was created to provide a better-performing alternative to bond funds while maintaining low correlation with the stock market. First, the strategy prioritizes capital preservation. Second, it aims to produce annual returns that exceed what can be found in the US high yield bond market (the benchmark).

The strategy makes event-driven investments in stocks, bonds, and bond-like securities. LVS Advisory analyzes corporate events such as mergers, reorganizations, liquidations, and other situations, and invests where the returns are predictable and attractive.

The LVS Event-Driven Portfolio invests in US-listed securities and holds between 15 and 40 positions. The Portfolio is managed with minimal leverage.

## LVS Growth Portfolio

### Strategy Description

The LVS Growth Portfolio seeks to grow money at the highest possible rate by investing in a portfolio of high-quality growth stocks. The best-performing stocks over the long run are tied to businesses that experience the greatest growth in cash flow per share. LVS Advisory employs a rigorous research process designed to identify exceptional companies.

LVS Advisory utilizes a bottom-up investment research process that involves studying financial statements, profiling executive teams, and conducting interviews with industry experts. LVS Advisory combines an assessment of quantitative and qualitative characteristics to determine the most attractive businesses to invest in over the long term.

The strategy invests in domestic and international securities and holds between 15 - 40 positions. The Portfolio is long-only and managed without the use of leverage.

## LVS Levered Event-Driven Portfolio

### Strategy Description

The LVS Levered Event-Driven Portfolio was created to provide a higher-risk, higher-return version of the Event Driven Portfolio (described above). The levered version of the Event-Driven Portfolio invests in the same securities but with 40% to 60% margin leverage added. The expected result is for the levered portfolio to generate returns that are 40% to 50% higher but with double the volatility and drawdown risk.
